## VIEWPOINT VP36

Viewpoint Summary:	
Location:	Elevation:
Goodwood Road, Minjah VIC	136 m
Coordinates:	Viewing Direction:
37°58'13.06"S 142°30'50.17"E	East
Distance to nearest WTG:	Viewer Sensitivity Level:
5.54 km	<b>Low</b>
Land Use:	Visual Magnitude:
Low Use Road	<b>Low</b>
LCU:	Representative Dwellings:
LCU01: Volcanic Plains	<b>D289, D290, D291</b>

Existing Landscape Character Description:	Potential Visual Impact:
This viewpoint is located on Goodwood Road, a low use road, providing access to a number of rural residential properties. It has been selected as a representative viewpoint for non-associated dwellings D289, D290 and D291.	The viewpoint is located approximately 3.19 km from the nearest turbine. Given the flat terrain and the limited intervening vegetation to the east, views of the turbines are likely to be available from this location. Existing windbreak vegetation to the southeast helps filter views of the Project from this viewpoint.
The surrounding topography is generally flat, with land predominantly cleared for grazing. Rows of windbreak vegetation extends along the property boundaries, with additional vegetation visible in the distance.	Due to the distance from the Project, it is expected to occupy only a portion of the view and form a minor element in the landscape.
	The visual magnitude of the Project from this viewpoint is assessed as <b>Low</b> , resulting in an overall visual impact of <b>Low</b> .

## VIEWPOINT VP37

Viewpoint Summary:

Location:	Elevation:
Minjah-Hawkesdale Road, Minjah VIC	124 m
Coordinates:	Viewing Direction:
38°4'20.76"S 142°28'16.12"E	Northeast
Distance to nearest WTG:	Viewer Sensitivity Level:
4.81 km	Low
Land Use:	Visual Magnitude:
Low Use Road	Low
LCU:	Representative Dwellings:
LCU01: Volcanic Plains	D303, D305

Existing Landscape Character Description:

This viewpoint is located on Minjah-Hawkesdale Road, a low use road, providing access to a small number of rural residential properties. It has been selected as a representative viewpoint for non-associated dwellings D303 and D305.

The surrounding topography is predominantly flat, with land cleared for grazing. Rows of windbreak vegetation extends along the property boundaries in the distance and in some parts of the road corridor.

Potential Visual Impact:

The viewpoint is located 4.81 km from the nearest turbine. Given the flat terrain and the presence of scattered, distant intervening visual elements to the northwest, filtered views of the turbines would be available from this location.

As a result, the Project is likely to occupy a small portion of the view and form a minor element in the landscape.

The visual magnitude of the Project from this viewpoint is assessed as **Low**, resulting in an overall visual impact of **Low**.
